Animals With Wallace's Circus Particular.

To those who are loltering on the circus ground when the magnificent parade of the Great Wallace Show returns to the tents in this city on next Saturday after-

oon and night, it may appear that the massive cages and dens of animals are placed indiscriminately in the menageric tent, but this is not the case.

It is absolutely necessary for the peace of the families represented that the arrangement of the animals be the same day after day. If the zebra cage is first, the mankey cage next, the polar bear the monkey cage next, the polar bear next, the seals next, the hippopotamus next, the occlot next, the tigers next, and next, the occlot next, the tigers next, and so on down one side of the mammoth menageric tent and back on the other one day, the same arrangement is necessary after that. The ends of the cages are closed, so that the animals cannot see their neighbors, but they can shell them. Any change of order among the dens will promptly start something in the zoo.

When the Great Wallace Show exhibits here, the circus patron can obtain much interesting information by closely observing the Wallace first prize colossal menagorie.
